**Von Scott Mitchell Rosenberg : Cowboys and Aliens** before purchasing it in order to gage whether or not it would be worth my time, and all praised Cowboys and Aliens:

Kurzbeschreibung Arizona. 1873. The ultimate showdown between cowboys and Indians is interrupted by an alien invasion. Every conqueror believes himself moved by a higher power, his destructive actions justified by necessity, compassion, or divine providence. In the greatest and most deadly expansion the world has seen, European settlers pushed west, decimating the native population without a second thought. But when aliens invade, they give the cowboys the fight of their lives, forcing them to pair with the Indians in a battle for control of the planet. The Old West will never be the same. Cowboys and Aliens is the graphic novel on which the major movie starring Daniel Craig and Harrison Ford is based.
