Nice little collectionVon GiuseppeJay Benford is one of the really ingeniuos minds when it comes to the essentials of design and construction of seaworthy little crafts, sporting some as uncommon as deliberate solutions to some of the well known recurring problems concerning seagoing windpowered vessels.This little booklet is worth having even if You are about to buy and change/customize Your boat rather than plan building one from scratch.

KurzbeschreibungFirst published in 1975, this classic guide is a collection of basic boat plans of a variety of Benford designs, ranging in size from 7 to 131 feet in length and selected from the custom designs created over the past three

decades. It is designed as the spark to fire ones ideas about the sort of boat one really wants or to suggest an idea for a new boat. The fourth edition includes a number of designs new since the third edition and is heavily illustrated with photographs and plan drawings.
