I Expect Judgement From Fans and/or Friends of the Author Yet I Must SayVon Stella CarrierIt is truthfully difficult for me to rate Dancing Forever With Spirt; Astonishing Insights From Heaven by Garnet Schulhauser only three stars because I

enjoyed his previous book a lot more. For this reason alone, I did not want to even review it (even though I even pre-ordered it back in February well before the book release) due to my awareness that both positive and negative karma even applies to the intent applied when you write about other peoples written comments/articles and/or published works. However, my intuition nudged me to do so out of consideration for future readers who may enjoy this book more and my awareness that I may want to order future works from this author. The Good points of this book; The author takes a compassionate stance towards urging others (both outside and inside the new age community) to accept other people regardless of differences and he writes in a way that shows him coming from the heart when he says this. His written revelation on page 11 via Albert that a person can appeal to their spirit helpers to adjust their life plan is helpful (Im grateful for what Im blessed with, especially a gem of a husband). I also like the way the author described how he felt and what he says when he visited the world/realm that his late mother and other family members now resided in. However, I do not consider myself a victim, but the authors revelation on that chapter encouraged me to get further spiritual and professional help around coming to peace with being judged based on my perceived emotional and/or intellectual intelligence instead of trying to resist and/or run away from it. His writing also gets creative on chapter five when he delves into the concept of other worlds such as the potential of the New Earth reality on chapter five. Chapter 6 of Friends In High Places was interesting as well (tv works based on either chapters 5 or 6 would make for some interesting sci-fi/fantasy viewing based on just these two chapters alone). The parts of the book that made me a little uneasy; Page 44 the author goes on to mention his life reviews and then emphasizes how he was concerned that he would be slow or dim-witted to other people. I easily can understand his reasoning for this because I have noticed across the new age communities and across various socio-economic classes (both poor and wealthy) the need for people to be seen as smart with a high wit by others (which is obviously understandable because it is common knowledge that higher paying jobs are more freely given to people who have a reputation for being and/or appearing smart as well as the ease in making a certain number of friends). The author is entitled to his viewpoint yet I find it ironic that he worries about this even more so than appearing crazy to others throughout the book (which sadly many people who shun new age books will equate both craziness and questionable intellectual capacity regardless of a persons income and/or occupation). My point is that there is a scene in the book where he shows understandable concern for a mother of three who was locked in a mental institution due to a misunderstanding around her viewing another realm in her waking life. He implies to readers that the psychiatrists were too harsh in their judgement towards this mother which I can see why he would be compassionate for the mothers plight. However, he seems to express less of a modicum of sympathy for people who are judged either accurately or inaccurately by their intellectual/emotional potential by expressing his concern for wanting to coming across as quick witted on page 44 (although as I said before he is far from alone, it is just that I feel that his sentiment overlooks late bloomers and/or people who have been misjudged and just need to figure out how to put themselves in a more favorable light in regards to their potential). The final chapter that has me feeling an urge to speak up is on Chapter 15. I agree that psychic predictions and/or what a person sees in their own life is not set in stone (which is why Im well aware that a persons personal intuition must override whatever a horoscope and/or what another person says (regardless of if they are known to be wise, psychic, and/or both). In other words, Im well aware when I can take into account information from another source and when to solely listen to my own intuition over what is being communicated to me. However, he says that his spirit guide Arthur told him that only advanced souls can see into the future. I can see why the author feels this way and Im well aware that there people have different levels of psychic ability and some people are going to have to work at it more than others. However, there is no mention or explanation made of people who are able to dream about their future before it happens (which has happened to me multiple times even without trying because Im logically/intuitively aware that my higher self was trying to get my attention about certain matters in my sleep when I unintentionally overlooked them in my waking life). The author at least acknowledges that it is possible to travel into the future in a non-physical sense (which I interpreted to be there is potential for a living soul to travel into the future via meditation and/or lucid dreaming). However, there was no information explaining this and non-existent information of people who can dream about their futures before they happen (more as warnings and/or guidance from their higher selves and/or heavenly spirit allies). I have little doubt that Garnet Schulhauser has a connection with his spirit guide Albert and that the journeys he made with his spirit guide in astral form did happen. It is just that I feel that even the information quoted from his spirit guide Albert is not the absolute fixed truth. My heart is guiding me to avoid elaborating more on why I do not take what even Albert has said as the definitive/absolute/fixed rules to go by out of consideration for the author and those who will buy and enjoy his book more (especially in case Im drawn to any of his future books). Overall, Dancing Forever with Spirit Astonishing Insights From Heaven is more of a healing comforting book for those who may have lost a loved one, but the insights from heaven are tailored more towards people who may not have yet been exposed to that many books on the afterlife and/or heaven.
