KurzbeschreibungThis e-book contains Greek to English flashcards of more than 1000 of the most used words in the

New Testament, complete with frequency numbers and principal parts of verbs. Each flashcard has two sides, showing the Greek term first, then showing its English equivalent or its definition, second. There are seven sets of these terms in all, including five randomized sets, and one in alphabetical order for easy searching. This course, which is a supplement to any beginner New Testament Greek grammar, also corresponds to William Mounce's Basics of Biblical Greek Vocabulary Cards, including each listed card number. All terms are shown in their lexical form. Nouns are shown with the addition of a genitive case word ending, followed by its corresponding article, (masculine, feminine, or neuter). Adjectives are shown with the addition of their corresponding feminine and neuter word endings, where applicable. Principal parts of verbs are shown on the definition side of the term. Principal parts of verbs include (in this order): Imperfect Active (always shown in brackets "[ ]"), Future Active, Aorist Active, Perfect Active, Perfect Middle/Passive, Aorist Passive, and sometimes Future Passive. Principal parts that do not occur in the New Testament are shown with a hyphen " - ", or left blank. Fully functional Table of Contents.
