KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Nicht nur ueber VirenVon Dr. Martina OnekoEin excellentes Buch, nicht nur fuer medizinisch taetige. Der Anfang beschreibt die erste Ebola Epidemie und als ich es las war es als ob ich selber dabei war. Die Beschreibungen waren so lebensnah und wirklich. Im weiteren Verlauf bekommt man viele Einblicke in die Arbeit und Frustrationen der Organisationen die Entscheidungen ueber unser Leben hier in Afrika treffen. Ich lebe seit 25 Jahren in verschiedenen

afrikanischen Ländern.

Kurzbeschreibung "An invaluable portrait of the evolution of international health in recent decades." William Bynum, Wall Street Journal
When Peter Piot was in medical school, a professor warned, There's no future in infectious diseases. They've all been solved. Fortunately, Piot ignored him, and the result has been an exceptional, adventure-filled career. In the 1970s, as a young man, Piot was sent to Central Africa as part of a team tasked with identifying a grisly new virus. Crossing into the quarantine zone on the most dangerous missions, he studied local customs to determine how this disease—the Ebola virus—was spreading. Later, Piot found himself in the field again when another mysterious epidemic broke out: AIDS. He traveled throughout Africa, leading the first international AIDS initiatives there. Then, as founder and director of UNAIDS, he negotiated policies with leaders from Fidel Castro to Thabo Mbeki and helped turn the tide of the epidemic. Candid and engrossing, *No Time to Lose* captures the urgency and excitement of being on the front lines in the fight against today's deadliest diseases. *Pressestimmen* Starred review. ...Piot helped assure that affordable drugs revolutionizing AIDS treatment would be available to the poorest victims. He leaves a legacy of change and hope in two worlds: medicine and politics and an urgent reminder that their cooperation saves lives.
