Von Chris Stuart, Mathilde Stuart : On Track: Quick ID guide to southern and East African animal tracks

before purchasing it in order to gauge whether or not it would be worth my time, and all praised On Track: Quick ID guide to southern and East African animal tracks:

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. great reference bookVon AlexandraGreat pleasure to look at and use. Recommended for purchase any time. Neat book to take along on a holiday trip or a day out.

KurzbeschreibungFollowing the success of the earlier Scatalog Quick ID guide to southern African animal droppings, here's another quick and quirky identification guide, this time to tracks of the regions most commonly found mammals, but also includes tracks of reptiles, rodents, birds and insects. A simple key on the inside front cover directs users to any of 11 categories, such as cloven hooves, paws or 'tramline-like trails'. Nearly 100 animals or closely related groups of animals are depicted; for each, there's a silhouette of front and back feet and a colour photograph of the track the average measurements for each track a short description of the track information about the circumstances and likely habitatConcise and to-the-point, this pocket-sized reference will prove indispensable in the field, no matter the experience of the user.KurzbeschreibungFollowing the success of the earlier Scatalog Quick ID guide to southern African animal droppings, here's another quick and quirky identification guide, this time to tracks of the regions most commonly found mammals, but also includes tracks of reptiles, rodents, birds and insects.
