Von Sandra Clayton : Osprey Summer: A Very American Experience (Voyager Book 4) (English Edition)  
before purchasing it in order to gage whether or not it would be worth my time, and all praised Osprey Summer: A

Very American Experience (Voyager Book 4) (English Edition):

Kurzbeschreibung In this fourth book in the Voyager series the Claytons take the reader on a tour of Americas Atlantic coast from the marshes and manatees of southern Florida to the windswept shores of New England. Navigating their 40-foot catamaran through rivers and creeks, lakes, canals and ocean passages their route includes the Intracoastal Waterway, Chesapeake Bay, New York Harbor and Cape Cod. On the way they take in some of Americas most famous towns and cities as well as some of the most tranquil anchorages imaginable. With her usual wry humour and observant eye Sandra captures the practicalities of life aboard, the beauty and variety of the country and the kindness of the people. At the same time she weaves in some fascinating insights into Americas history. A rare treat for sailors and non-sailors alike.

ber den Autor und weitere Mitwirkende As a free-lance writer my output ranged from general magazine articles to educational puppet plays for children and an award-winning radio play for the BBC. Part of my day job was to make specialist information accessible to the general public. Inevitably, after I took up blue water sailing with my husband, I wrote to make those experiences which I found so compelling accessible to as wide an audience as possible. Through sailing, for which I had no liking initially, I developed a love of the sea. In loving it, I became aware of its fragility. If my books were to achieve anything among readers, apart from an enjoyment of places and people and open spaces, I should want them to see the oceans of the world as the truly extraordinary environments they really are, instead of just a food source and a dumping ground for the world's garbage. There is no more captivating sight than a family of common dolphins teaching two very young calves to swim with your boat, or a pod of 80-foot fin whales observing you minutely as they overtake you at four-times your speed. They do not endanger us. But, sadly, we are constantly damaging them.
