Unusual Von Jeanne Adamek I loved the characters in this extraordinary novel! Having been to the Smokey Mountains, I realized Carolyn Jourdan has gotten the people down pat--I felt like I knew them. The mystery was certainly different. I am sure that not all die-hard mystery lovers will like this book, but I did. I had to keep on reading to just see what the author would do next. The only problem I had was with the ending. Not with "who did it" or "why?" but with the pacing of the book itself--it just wasn't like the rest of the story. But except for the ending I would definitely recommend the book for the different characters--so much so that I have already ordered her other books!

Kurzbeschreibung A USA Today best seller! Jourdan is an Audible, 5-time Wall Street Journal, and USA Today best selling author. "Out on a Limb" is a #1 Mystery and #1 Cozy Mystery on . ers describe this cozy, scientific, medical mystery as "CSI Meets Animal Planet." In "Out on a Limb" Phoebe McFarland has just moved back to her hometown of White Oak, Tennessee, a sleepy rural community nestled in the mist-shrouded ridges and isolated hollows of the Smoky Mountains. Now she spends her days working as a rural home health care nurse, making calls on a quirky roster of housebound characters she's determined to take care of whether they cooperate or not. She applies this same optimism to her love life, despite the fact that she's been dating for 38 years without locating any husband material. When she runs into her childhood sweetheart, Henry Matthews, a wildlife ranger for the Great Smoky Mountains National Park, it looks like she might've found her man. But Phoebe and Henry's chance for romance has to be put on hold while they undertake a desperate search for a young woman who mysteriously vanished from the park during a gathering of world famous biologists and botanists, including a charismatic Frog Whisperer. Carolyn's book "Medicine Men: Extreme Appalachian Doctoring" was a #5 Wall Street Journal best seller and #1 best seller in Non-Fiction, Biography, Memoir, Medicine, Science, and Doctor-Patient Relations.
