KurzbeschreibungAccording to the author's foreword this book covers: "outfitting, making camps, dressing and keeping game and fish, camp cookery, forest travel, how to avoid getting lost, and what to do if one does get lost, living off the country, what the different species of trees are good for (from a camper's viewpoint), backwoods handicrafts in wood, bark, skins and other raw materials, the treatment of wounds and other injuries, and some other branches of woodcraft that may be of service when one is far from shops and from hired help.[Note: this pre-1923 book has been converted from its original format and may contain an occasional defect from the conversion process or from the original publication.]
