An excellent and hilarious classic!Von Ein KundeThis is not a new book, but was written sometime around the turn of century and has been considered a classic on most 'required reading' lists. A spoof on the awe in which society holds the Holy Writs of the scientific community, the author marshalled an impressive army of established, documented

facts for which the official scientific explanations are simply absurd. A 'must read' for anyone who believes science teaches The Truth -- or for anyone who suspects otherwise.0 von 7 Kunden fanden die folgende Rezension hilfreich.
french edition ????Von Ein KundeHi, Since I had read "le matin des magiciens" by pauwells (5 years ago) , I'm looking for a french edition of the book of the damned.would you please inform me if you know where i could find it??
