Kundenrezensionen Hilfreichste Kundenrezensionen 0 von 0 Kunden fanden die folgende Rezension hilfreich. Book is better than the cover! Von Jeanie William Delamar writes a fabulous book, but the cover is nothing like the contents. This is a prime example that you cannot judge a book by its cover. A fantastic novel depicting the inside workings of an urban hospital administration under fire from political and racial groups, greedy/arrogant doctors, underpaid

nursing staff, and money-hungry attorneys. On top of all that, there is an angel of mercy roaming the halls, helping those on their way out the back door go a little faster. I could not put it down until the last word. CJ Loiacono

Kurzbeschreibung Doug Carpenter, a new administrator, the third in four years, at Eastern Medical College Hospital, fights hospital power politics and physician greed while trying to provide a good setting for patient care. This combative scene forms a constant barrier to a successful, smooth-running operation and creates a threat to Doug's own position, but that's not all. A patient commits suicide. A drunk anesthesiologist kills a mother during an emergency delivery. Several patients are victims of an angel of death. A patient is poisoned by an unscrupulous doctor. A union strike explodes. A female goon brutalizes two nurses. On top of all that, Doug's wife is injured in a terroristic attack instigated by the pro-union forces. This all happens in only a matter of weeks, challenging Dougs every emotion, diplomatic expertise, morals and ethics.
