Von Ein Kunde This book is a must read for all in ministry, full-time, part-time or volunteer. Freudenburg's sabbatical experience led him to understand the needs of his family (him) and the need for the church to enable, allow and train parents to be the source of their children's faith and practice of faith. This book will challenge

your thinking about ministry and life in ministry. It will create a paradigm shift in your churches priorities which I believe would be the most positive move you could make. This book could easily be titled the Family Friendly Ministry. Change the word church to fit your organization and you will be challenged to a more effective and efficient ministry. 0 von 0 Kunden fanden die folgende Rezension hilfreich. Family First Von Jim L Wilson Should the Christian family support the church and be church-centered, or should the church support the family and be family-centered? The Family Friendly Church, by Freudenburg and Lawrence argues that to reach the needs of Boomers and their families a shift needs to take place from a church-centered family to a family-centered church. By facilitating ministry with the families, not to them, the church accomplishes its mission and develops strong families.
