Dr Ruth WestheimerThis is one of HG's more popular books. This was made into a movie "The Food of the Gods" (1976) and closer to the book "Night of the Lepus" (1972) which was an early form of Rabbit Transit.As with all of HG's work this is more of a social commentary than it is a sci-fi story. A scientist finds a way or a food to keep growth from being inhibited. It gets out of hand in several stories each

tied together with the single theme. The first part of the story is simple how you deal with big chickens. However it gets a little more complex when it's "how do you deal" with big people. HG shows how England is a stagnant society in the least changes upset the status quo and need to be squelched. As you can see he is split this up into several books each book being a stand-alone story yet counts on the story before it. As you read this story you must think how I react if I had to deal with giants, how I react if I was the giant. Hopefully we come away from the story with a better understanding of how society works and /or can work. "He was no more than a great black outline against the starry sky a great black outline the threatened with one mighty gesture the firmament of heaven and all its multitude of stars." "Was Dr. Ruth and her assumption?" The Food of the Gods Night of the Lepus ~ Stuart Whitman 0 von 0 Kunden fanden die folgende Rezension hilfreich. They dislike that word so much that from the columns of Nature, which was from the first their distinctive and characteristic paper, it is as carefully excluded as if it were-that other word which is the basis of all really bad language in this country. But the Great Public and its Press know better, and "Scientists" they are, and when they emerge to any sort of publicity, "distinguished scientists" and "eminent scientists" and "wellknown scientists" is the very least we...
