What else do you need?Von Miss Page-TurnerEthan is your regular nice guy from the present and Prenna the girl from the future who is contained by her community of time travellers. Together they are reckless and ready to save the world. There's no possible future reading scenario in which you are not falling in love with these two!You might have guessed by now that time travelling is involved in THE

HERE AND NOW. I've been used to single individuals being able to travel through time under certain limitations. In this story it's a group of people from the future that comes to the present in order to save themselves, the old world and humankind's future. Like they are fugitives of time itself, awesome and complex concept! Prenna and Ethan have their magic moments. Their moments that have been destined by fate. And they have their absolute ordinary teenager moments. You are going to love that their relationship is off to such a natural start because Ethan and Prenna have known each other for some time now. They go to school together and fall in love just like any other couple would. Well, that doesn't say that there aren't tons of problems pre-programmed. A big conspiracy is brewing and Ethan and Prenna are determined to save the world. There are some dangerous leads Ethan and Prenna are following. The story could've used some additional explanations here and there, one or two chapters stealing time for Ethan and Prenna to actually be together, buying them time for some sweet romance. Ann Brashares really did think up a horrible future scenario that is to be prevented at all costs. When you are not scared about it you are fascinated trying to puzzle over how it could all come to this future. THE HERE AND NOW is an intricately spun story about our world's future with all its possibilities and dangers. So you can expect big action scenarios, the bad guys being really corrupt and scary and more than a few conflicts between Prenna's desire to be with Ethan and her strict community standards. 4/5 ***** THE HERE AND NOW - Conspiracies, time travel and a timeless love story. What else do you need? When I got a copy of THE HERE AND NOW I read it believing Ann Brashares a debut author. Well, she's only the author of the very famous THE SISTERHOOD OF THE TRAVELING PANTS series. Ann's writing is practiced, love and suspense aren't battling for the reader's attention, they are complementing each other. I can easily count THE HERE AND NOW to my favourite time travel stories and new releases of 2014! So all we've got to do now is hope for a sequel!

Kurzbeschreibung From the #1 New York Times bestselling author of the Sisterhood of the Traveling Pants series, The Here and Now is an epic star-crossed romance about a girl who might be able to save the world . . . if she lets go of the one thing she's found to hold on to. Follow the rules. Remember what happened. Never fall in love. The world Prenna James comes from is in ruins. She and the others who escaped are here to prevent humanity's destruction. But if they don't follow The Rules, everything that matters will be gone: Friends. Families. Dreams. Love. Ethan Jarves can never know Prenna's secret. That she's not from another place. She's from another time. "This gripping story is set in a world unlike any other and inhabited by beautifully imagined characters that stay with you long after the last page.
