Kurzbeschreibung  
Written in thirteen days in 1564 by the renowned Elizabethan magus, Dr. John Dee, The Hieroglyphic Monad explains his discovery of the monad, or unity, underlying the universe as expressed in a hieroglyph, or symbol. Dee called The Hieroglyphic Monad a "magical parable" based on the Doctrine of Correspondences which lies at the heart of all magical practice and is the key to the hermetic quest. Through careful meditation and study of the glyph, its secrets may be slowly revealed.

Synopsis  
Translated into English for the first time, this book was written by the Elizabethan magus, Dr. John Dee in 1564. He explains his discovery of the monad, or unity underlying the universe, as seen in a hieroglyph or symbol. The monad is representative of the alchemic process and goal of the magus, who in partaking of the divine, achieves that gnostic regenerative experience of becoming God and thus furthering the redemption and transmutation of the worlds.
